# Liquidity Settlement Gateway: setup

Fill in the boxes and download your **.env** file. Everything happens in this browser tab; nothing is sent anywhere. Keep the file private and never commit it.

## Circle (USDC payouts)

CIRCLE API KEY

CIRCLE BASE URL

https://api-sandbox.circle.com

Start with the sandbox URL. Switch to https://api.circle.com only after testing.

CIRCLE MINT USDC DEPOSIT ADDRESS (ETHEREUM)

0x...

## MailerSend (email OTP)

MAILERSEND API TOKEN

SENDER EMAIL (VERIFIED DOMAIN)

approvals@your-domain.com

MANAGER EMAIL (RECEIVES CODES)

## AWS S3 (documents)

REGION

us-east-1

BUCKET NAME

KMS KEY ARN

arn:aws:kms:...

AWS credentials are not entered here. Use an IAM role (recommended) or set AWS_ACCESS_KEY_ID / AWS_SECRET_ACCESS_KEY in your server's environment.

## Ethereum

RPC URL (ALCHEMY, INFURA, YOUR NODE)

https://...

CHAIN ID

11155111

1 = mainnet. 11155111 = Sepolia, for use with Circle sandbox. USDC contract below must match the chain.

USDC CONTRACT

0xA0b86991c6218b36c1d19D4a2e9Eb0cE3606eB48

## Infrastructure

POSTGRES URL

••••••••••••••••••••••••••••••••••••••••••••••••

RABBITMQ URL

••••••••••••••••••••••••••••••••••••

## Access and limits

MANAGER ACCESS CODE (6+ CHARACTERS, HASHED IN THIS TAB)

••••••

Pre-filled with 244500. The manager types it at approval time; it is never read from an uploaded file. A 6-digit code is easy to guess if your .env file ever leaks, so keep that file private (or choose a longer code).

MAXIMUM PER CLAIM (USDC)

1000000000000

DAILY TRANCHE SIZE, PER UTC DAY (USDC)

1000000000

TOTAL CEILING (USDC)

1000000000000

Generate operator token, manager token and signing secret

OPERATOR TOKEN

MANAGER TOKEN

DOCUMENT SIGNING SECRET

Operators sign in with the operator token; managers with the manager token. Share each only with the right person.

Create .env file
